

## Complex Population Survey of Non-Invasive Arterial Elasticity, Vascular Wall Rigidity, Low Resistive Arteries Tonus and Other Parameters

**Mantskava M., Pogosova N.**

This work is a clinical-laboratory trial design (version 1). Research planning, performance, and summary have a fundamental (scientific) and a useful (clinical) value. The previous official design consists of a description of the target and its relevance, instructions from target groups, a literature review, estimated results and a list of literature references.
